I am wondering if you have any tutorials that explain how to implement copies from model to model? I noticed the "you can do this" but now I don't know what to do. Thanks for your time. You can copy an object from one model to another in the VSE, as

long as the source object and destination object share the same mesh and vertex groups. Use the "Shift+A" function on the Dope Sheet to copy it from the Dope Sheet to the timeline view. Use the "Shift+A" function on the Dope Sheet to copy it from the timeline view to the Dope Sheet. Use the "Edit" function and switch to vertex tools mode. Select the object that you want to copy from, press the D shortcut, and select "Copy to Clipboard". Select the object that you want to copy to, press the D shortcut, and select "Paste to Clipboard". Use the VSE to move your object from the first object to the second. I have been doing this for a long time but I am using three.js in particular. I think the new clipboard setup will make this easier than it has been in the past

but I am not sure. The only tutorial I have found is the one Thom talks about. Thom talks about how to copy and paste. Then I found another one here that talks about it using the node based system. Hi, Thom has several tutorials on his site, including tutorials about how 82157476af
